Profile

Highly motivated, versatile and results-oriented Full Stack Software Engineer with 4+ years of experience building innovative and user-friendly web applications. I possess strong skills in both front-end and back-end development, enabling me to tackle projects from conception to deployment.

Skills

1. Technical Skills:

- Proficient in HTML, CSS, JavaScript, TypeScript, Tailwind CSS, SCSS, MUI, Solidity, Python, SQL, PostgreSQL, ember.js and Node.js.
- Experience building scalable and interactive user interfaces using React.js.
- Cloud infrastructure management using AWS tools.
- Knowledge of responsive design techniques and mobile optimization.

2. Design and User Experience (UX) Skills:

- Proficient in design principles and experienced in using tools like Figma.
- User-centered approach to web product development.
- Familiarity with web accessibility guidelines (WCAG) for inclusive design.

3. Collaboration and Communication Skills:

- Effective collaboration with designers, back-end developers, and cross-functional teams.
- Strong verbal and written communication skills for articulating ideas and project updates.
- Troubleshooting, critical thinking, and adaptability in changing project requirements.
- Proficient in Git and GitHub for collaboration and version control.

Work Experience

Full-stack Engineer at SozoRock Health

Feb 2024 – Aug 2024

- Implemented transit booking features to optimize patient transportation logistics.
- Led the design of the logistics and pharmaceutical management system, utilizing Next.js, AWS, and Mapbox.
- Built real-time reporting, mapping, and geo-location services to streamline patient and healthcare provider interactions.
- Oversaw and implemented continuous integration and deployment pipelines.
- Collaborated with stakeholders to improve operational efficiency, reducing service delivery times and increasing patient satisfaction.
- Ensured scalability and security in the architecture, following best practices for handling sensitive healthcare data.

Fullstack Engineer at Caltextrader

Aug 2023 – Jan 2024

- Collaborated with UI/UX designers to build the company's [official website](#).
- Designed and implemented user interfaces using React.js and material UI.
- Developed web products for clients using the latest web tools and technologies.
- Build robust and scalable APIs using node.js.
- Ensured security best practices were followed in handling user data and API access.

Lead Front-End Developer at Accomease

Mar 2020 – Aug 2020

- Designed and implemented user interfaces using React.js and material UI.
- Promoted a consistent look and visual theme across the website through uniform fonts, formatting, images, and layout.

- Identified and resolved website issues, including broken links, typographical errors, and formatting problems.
- Oversaw and implemented continuous integration and deployment pipelines.

Projects

- [Soshare](#): Mini social platform for sharing videos and posts within a vibrant community.

- Built app using React.js, material UI and node.js.
- Bi-directional communication using socket.io.
- Progressive streaming

Features

- Real-time content sharing.
- Soshare thread comments.
- Soshare likes.

- [Krypt-web3](#): Fin-tech crypto exchange platform.

- Built app using React.js, Solidity and ethers.

Features

- Sign-up and Sign-in with wallet.
- Crypto exchange.
- CRUD operation with solidity.
