## PROFILE

Highly motivated and results-oriented Full Stack Software Engineer with a passion for building innovative and user-friendly web applications. I possess strong skills in both front-end and back-end development, enabling me to tackle projects from conception to deployment. Seeking opportunities to leverage my skills and contribute to impactful projects.

## Skills

### 1. Technical Skills:

- Proficient in HTML, CSS, JavaScript, TypeScript, Tailwind CSS, SCSS, MUI and Node.js.
- Experience building scalable and interactive user interfaces using React.js.
- Familiarity with Next.js for server-rendered React applications.
- Cloud infrastructure management using AWS tools.
- Knowledge of responsive design techniques and mobile optimization.
- Familiarity with browser developer tools for debugging and performance optimization.

### 2. Design and User Experience (UX) Skills:

- Proficient in design principles and experienced in using tools like Figma.
- User-centered approach to web product development.
- Familiarity with web accessibility guidelines (WCAG) for inclusive design.

### 3. Collaboration and Communication Skills:

- Effective collaboration with designers, back-end developers, and cross-functional teams.
- Strong verbal and written communication skills for articulating ideas and project updates.
- Troubleshooting, critical thinking, and adaptability in changing project requirements.
- Proficient in Git and GitHub for collaboration and version control.

## Work Experience

### Lead Front-End Developer at Accomease

Mar 2020 – Aug 2020

- Designed and implemented user interfaces using React.js and material UI.
- Promoted a consistent look and visual theme across the website through uniform fonts, formatting, images, and layout.
- Identified and resolved website issues, including broken links, typographical errors, and formatting problems.
- Oversaw and implemented continuous integration and deployment pipelines.

### Fullstack Engineer at Caltextrader

Aug 2023 – Jan 2024

- Collaborated with UI/UX designers to build the company's [official website](#).
- Designed and implemented user interfaces using React.js and material UI.
- Developed web products for clients using the latest web tools and technologies.
- Build robust and scalable APIs using node.js.
- Ensured security best practices were followed in handling user data and API access.

## Projects

- [Soshare](#): Mini social platform for sharing videos and posts within a vibrant community.
  - Built app using React.js, material UI and node.js.
  - Bi-directional communication using socket.io.
  - Progressive streaming
  - Features**
    - Real-time content sharing.
    - Soshare thread comments.
    - Soshare likes.
- [React Admin](#): Product-oriented admin panel.
  - Built app using React.js, material UI, recharts and firebase.
  - Features**
    - Sign-in and Sign-up.
    - Data-visualization.
    - Serverless architecture.
